If you are taking any other medicines.

See Section 2

Follow the dosage instructions carefully.

See Section 3

Now read this whole leaflet carefully before you use this medicine. Keep the leaflet: you might need it again.

1. What this medicine is and what it is used for

This medicine is a medicine which is used to relieve the symptoms of hay fever and other allergic conditions such as pet or dust allergies. The capsules contain acrivastine which is an antihistamine that helps relieve allergy symptoms such as sneezing, runny nose and watery eyes.

It can also be used to treat the symptoms of urticaria, also known as hives, where the skin looks blotchy with white raised wheals (bumps) surrounded by redness. This medicine is for use in adults under 65 years old and adolescents aged 12 years and over.

2. What you need to know before you take this medicine

This medicine is suitable for most adults under 65 years old and adolescents aged 12 years and over but a few people should not use it. If you are in any doubt, talk to your doctor or pharmacist.

Do not take this medicine

- If you have ever had a bad reaction to any of the ingredients, or to the antihistamine triprolidine.
- If you have severe kidney disease.

If any of these apply to you, get advice from a doctor or pharmacist without taking this medicine.

Warnings and precautions

Talk to your doctor or pharmacist

- If you have kidney problems.

If you are taking any other medicines, including:

- Sedatives or tranquillisers (used to treat anxiety or sleep disorders).
- Ketoconazole (an antifungal used to treat fungal infections).
- Erythromycin (an antibiotic used to treat bacterial infections).

If you are not sure about any of the medicines you are taking, show the bottle or pack to your pharmacist.

If any of these bullet points apply to you now or in the past, talk to a doctor or pharmacist before taking this medicine.

If you are pregnant or breast-feeding

Ask your doctor or pharmacist for advice before taking this medicine if you are pregnant or breast-feeding.

Special warnings about this medicine

- Do not drink grapefruit juice while taking this medicine.
- This medicine may cause drowsiness and dizziness. Caution should be used when driving or operating machinery. If this product makes you feel drowsy or dizzy, do not drive or operate machinery. This product should not be taken whilst under the influence of alcohol.
